

FOCUS ON KEY REQUIREMENTS FOR AIR COOLER CLIENTS

As one of the world's largest manufacturers, AMI understand the requirements of their clients with whom they have an established relationship spanning over 25 years, supplying over 14,000 vessels. Whether you are involved in OEM supplies, ship owner/manager or fleet procurement, AMI can offer replacement coolers that fully comply with the latest Marpol Annex VI regulations. They also offer a re-design service allowing custom built coolers to individual customer specifications.

AMI use their experience to offer replacement units of top quality for all engine builders.

B&W | MaK | MAN | Pielstick | Sulzer | Wartsila | Mitsubishi | Daihatsu | Deutz | Jenbacher

Using the latest techniques in their state-of-the-art factories in the UK and the USA, AMI offers further cost-saving options:

- Cooler Refurbishment & Cleaning
- Re-use of Components
- Scrap Values Offered for Old Coolers
- Onboard Repairs

AMI can turn around some air coolers as quickly as five days. The short turnaround times along with low costs and high quality has seen AMI build firm relationships with the world's best known ship owners and managers.
